PREMIUM WOOD PELLETS

MORE BURN FOR YOUR BUCK™

**ALL NATURAL WOOD PELLET FUEL • LOW ASH • PREMIUM WOOD PELLET FUEL • ALL NATURAL
CLEAN BURNING • EASY TO USE • AN ENVIRONMENTALLY FRIENDLY FUEL FOR PELLET STOVES**

Thank you for using POTOMAC's PREMIUM WOOD PELLETS. Our Premium Wood Pellets are the fuel that your wallet and budget can afford - ***MORE BURN FOR YOUR BUCK!*** Low-ash, High BTU output and all natural is what makes our Wood Pellets an excellent fuel choice. Only the best, all-natural sawdust is used to manufacture our Premium Wood Pellets. No trees are ever cut to produce POTOMAC Wood Pellets as they are made from our mills.

PELLET STOVE OPERATION

Pour a bag of Premium Wood Pellets into your stove's hopper and start your stove as per the manufacturer's instructions. After the first bag, observe the color of the fly ash on the stove's glass and refer to the guidelines below for adjustments if necessary.

You may need to check your owner's manual on how to adjust the air flow to fuel ratio of your stove or check with your local pellet stove dealer.

- Gray/White in color, No adjustment necessary.
- Brown in color, increase the air flow slowly in increments until the color is Grey/White.
- Black in color indicates a very inefficient and dirty burn.

Check and see if the venting system is blocked and clean if necessary. Also, the air flow to fuel ratio needs to be adjusted.

CLEANING AND MAINTENANCE

Many new pellet stoves have large ash handling capabilities. To ensure the best operation of your new stove, be sure to remove any ash clumps, with an ash rake, (called "Clinkers" that may develop on the burning grate). Please refer to your stove's owner's manual for the specific cleaning requirements.

***** In addition to your regular maintenance, always have your stove and venting system professionally cleaned each year to ensure maximum efficiency.***

WARNING:

Combustion of this product results in the emissions of carbon monoxide, soots and other combustible by-products which are known to the State of California to cause cancer and reproductive toxicity. This product is not for Human or Animal consumption. To be used in approved pellet burning device.

*Pelotillas de combustible de madera del diametro superior del la calidad. Peso Neto 40 Libra (18.14 Kg)
Precaución: No para la consumación humana o animal. Para ser utilizado en dispositivo ardiente de pelletilla.*

Store in a cool dry location.
